

2022 Model Year Stellantis Government Fleet Production Updated 11/8/2021

Due to the continuing shortage of microchips necessary for vehicle production as well as additional supply chain and logistics issues, Stellantis has made a very difficult decision regarding all municipal customers.

Stellantis is not going to build a large number of models for any municipal customer in the US for the 2022 model year.

Stellantis Government Fleet will only be receiving production allocation and accepting orders for the following models:

- Charger Pursuit (V6 AWD only)
- Durango Pursuit (V8 & V6)
- Ram 1500 (DS) SSV
- Ram 1500 (DS) non-law
- Chrysler 300

That means that no other models will be built for government allocation the rest of 22MY. This includes the non-police Dodge Chargers, Dodge Charger PPV RWD, Chrysler Voyager, Chrysler Pacifica, Ram Heavy Duty Trucks and Chassis, Ram Promasters, etc. Other models may be available, but will have to be ordered as retail units, utilizing retail incentives if any such are available.
